

Diego Antonio Prudencio Cerfogli

Game Programmer — Computer Engineering, Robotics Track - Pontificia Universidad Católica
diego.prudencio@uc.cl itch.io Github

Game programmer focused on gameplay and interactive systems. Experience developing with Godot and Unreal Engine 5, using C#, GDScript, and C++.

VIDEO GAME DEVELOPMENT EXPERIENCE

Video Game Hardware Developer @ Busy Devs 2024-2025

- Designed and developed a custom controller, including PCB design, C firmware, and C++ plugins for UE5.
- Real-time input systems focused on responsiveness and signal processing with high responsiveness.

Postgraduate Diploma in Video Game Design – Chime Co Japan & AOne Games 2026

Universidad de las Américas

- Optimization and scene construction with Unreal Engine 5. Profiling, materials, shader management, etc.
- 3D model creation and UV management, using skeleton meshes to use animations in the engine.

VIDEO GAME PROJECTS

Independent Video Game Development 2024-Present

- Development of a personal video game in Godot using C#, focused on gameplay systems and architecture.
- Character controller, combat mechanics, enemy behavior, and level interactions.

CountDawn – Game Jam 2026

- Developed a 2.5D game using Godot and GDScript in a two-person team.
- Implemented billboard shaders, patrolling, detection, and enemy behavior.

Everything Spins – Game Jam 2026

- Developed a 3D game using Godot and GDScript in a two-person team.
- Implemented mouse-based interaction systems and gameplay mechanics.

SOFTWARE DEVELOPMENT EXPERIENCE

Software Engineer @ lakpa 2026

- Developed and maintained components for a platform supporting multiple concurrent users.

iOS Application Developer @ Copihue Studio 2025

- Optimized, expanded, and debugged a gamified mobile application developed with Swift and SwiftUI.
- Improved the application's performance and responsiveness.

Web Developer @ Tap-in 2025

- Real-time food pickup platform using Docker, Git, FastAPI, Python, React, TypeScript, and WebSockets.
- Worked in an agile team as the primary person responsible for the frontend.

Web Developer @ Mallas ING - Pontificia Universidad Católica 2022-2023

- Full-stack web application developed in a small team using Docker, Git, React (TypeScript), and FastAPI (Python).
- Worked as part of an agile team focused on continuous iteration, usability, and mobile experience.

RESEARCH EXPERIENCE

Undergraduate Research - Published IEEE Paper @ Pontificia Universidad Católica 2022-2023

- Applied neural networks (CNNs, transformers) to real-world computer vision segmentation problems.

Undergraduate Research @ Pontificia Universidad Católica 2023

- Integrated LiDAR and camera systems using ROS for 3D perception.

ADDITIONAL EXPERIENCE

Personal TrueNAS Server 2024-Present

- Manage a home server for game hosting and cloud storage.

Maritime RobotX Challenge @ Equipo Caleuche - Pontificia Universidad Católica 2023

- Developed control algorithms for a maritime vehicle. ROS2 integration and signal processing.

Agricultural Mobile Robot Prototype Design/Development @ Pontificia Universidad Católica 2022

- Computer vision, sensors and actuators, neural networks, and low- and high-level automatic control.

OTHER SKILLS

Tools

Languages

Unity, Go, Linux, Blender, Clip Studio Paint, Procreate
Spanish (native), English (B2 – FCE)
